Accessories	21
Technical Data	29

# The best solution for **switching** and **protecting** your **electric motor**.

Developed according to IEC 60947 and UL 508, the MPW line of motor protective circuit breakers provides superior performance and high short-circuit interrupting capacity for your applications.

## High Short Circuit Capacity (@380 V)

The MPW motor protective circuit breakers perform the switching and protect against overloads and short circuits, and their trip attachments may be calibrated up to nineteen times the maximum rated current of the circuit breaker.

High durability:  
up to 100,000  
operation cycles

Versions with pushbuttons or  
rotary knob, screw and spring  
terminals

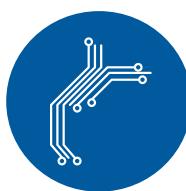

Sensitive to phase  
loss according to  
IEC 60947-4-1

Wide range of  
interchangeable  
accessories

Compact combined starter sets  
(direct on-line, reversing and delta-star)  
with the CWB9...80 contactors and  
CWC07...25 miniature contactors

Function of molded-case circuit  
breaker/fuse and overload relay  
in a single product

## Main Certifications

Mexico

Marine

European  
Union

Russia

EAC

Argentina

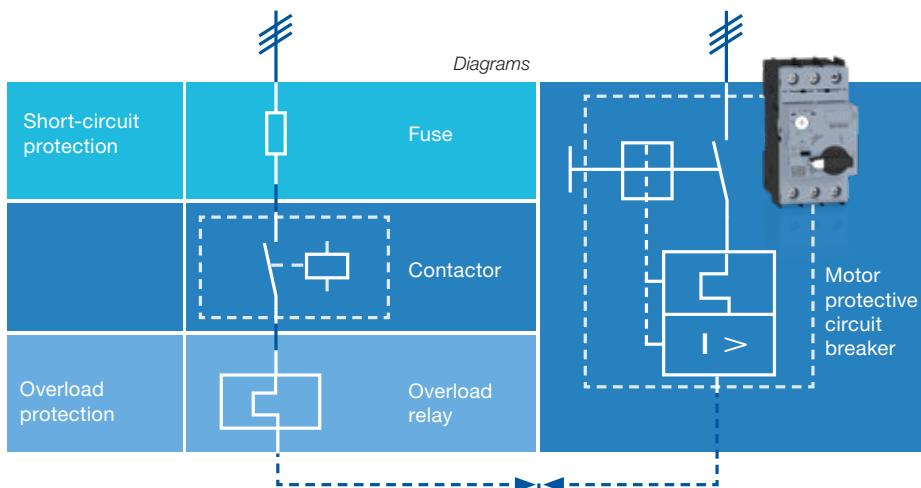

Canada and USA

## Main Characteristics

### Three Functions in a Single Product

Its main function is the protection against short circuits and overloads in electric motor applications. In addition, they allow switching operations (15 operations/hour) directly with their handle or buttons.

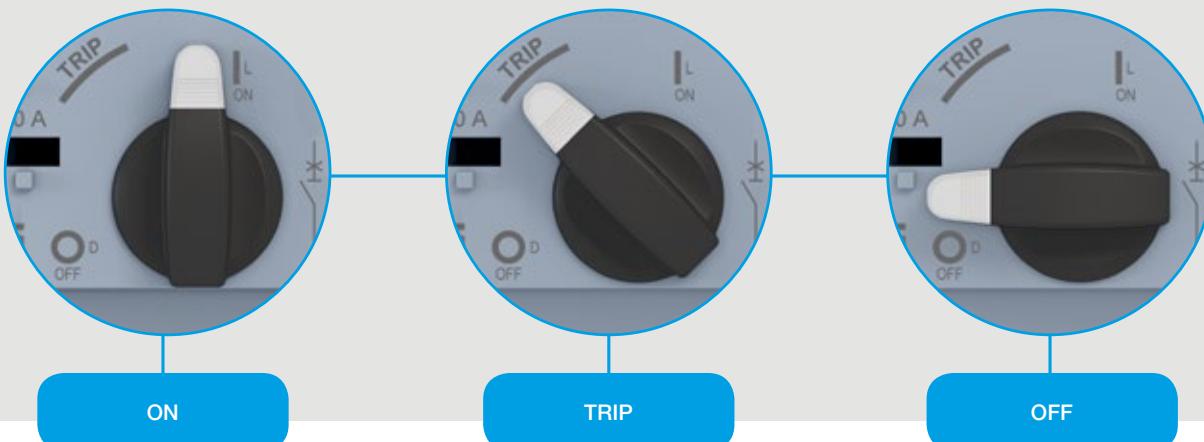

### Handles for Thermogram

The models of MRX handles coupled to the circuit breaker allow to open panels even with the handle in the ON position. This kind of function is commonly used on electrical panels where a thermographic analysis is necessary in preventive maintenance events. As default, this function comes disabled from the factory.

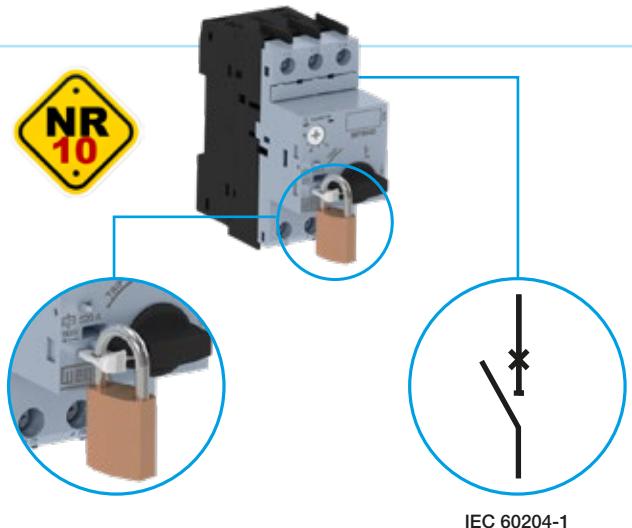

### Position and State Indication

Front identification of the operating status of the circuit breaker by means of its rotary handle (MPW40...100) or key (MPW18). On the motor protective circuit breakers with rotary drive, it is possible to indicate the TRIP with their handle, and their marking indicates the position of the electrical circuit switching devices.

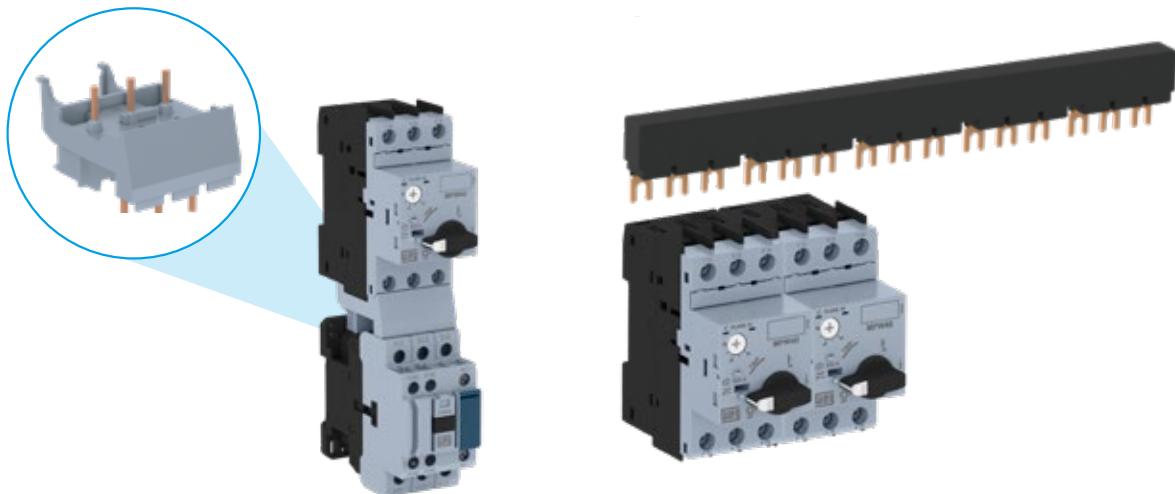

### Lock out, Isolation and Main Switch

All the MPW circuit breakers can be locked by means of seals or padlocks installed on the handle or front button, ensuring greater safety in stoppages for maintenance of panels and electric motors. In addition to this function, the circuit breakers comply with the isolation conditions of IEC 60947-3 and IEC 60947-2, that is, they may be used as an isolation device of electrical parts of a panel. They can also be used as main switches and emergency stop according to IEC 60204-1.

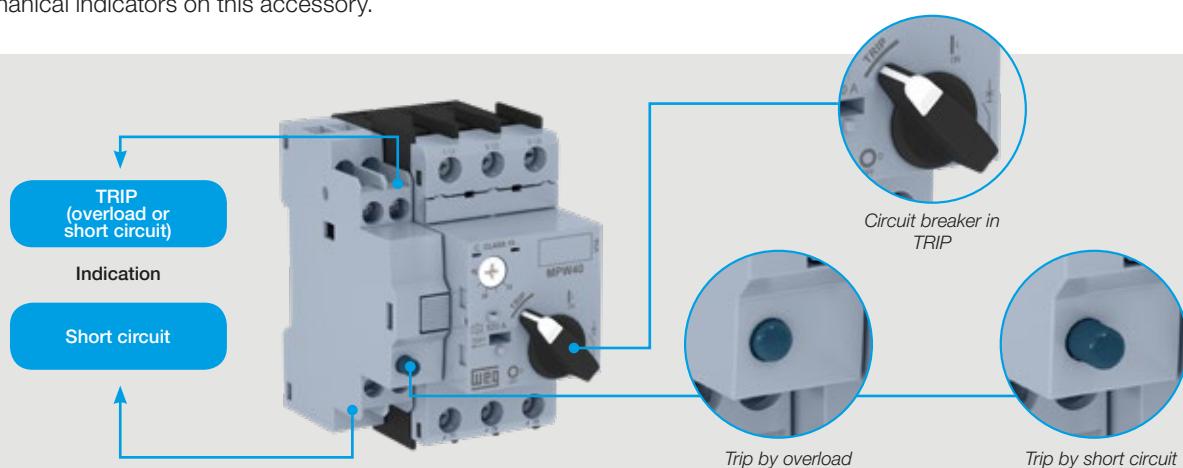

### Connectors and Busbars

Connection busbars (easy connection) developed to save time and avoid assembly errors by panel installers and original equipment manufacturers (OEMs).

### TSB Block for Trip Indication

The TSB accessory installed on the circuit breakers allow to signal the trip occurred by means of auxiliary contacts or mechanical indicators on this accessory.

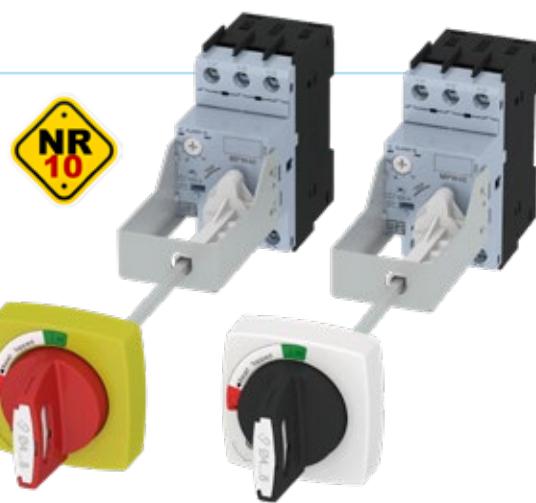

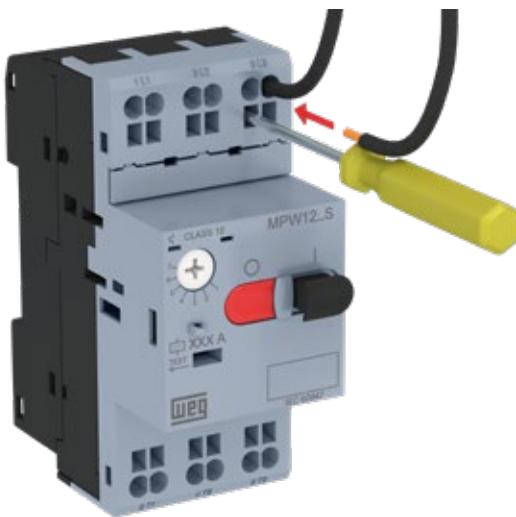

Note: using the TSB accessory, it is possible to use only one of the auxiliary contacts, the front (ACBF) or side (ACBS) contact.

## Main Characteristics

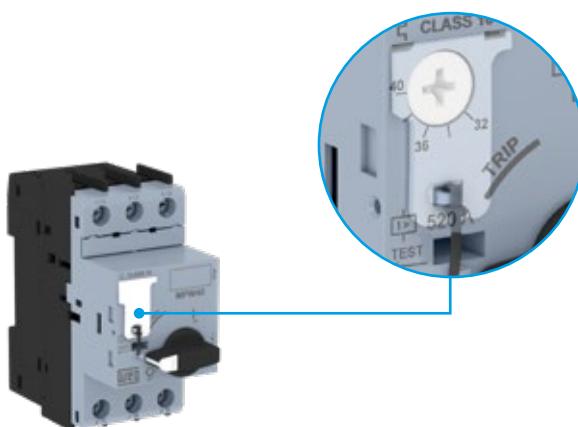

### Handles for External Drive

Additional handles installed on the MPW circuit breakers allow external drive of the circuit breakers on panels, ensuring safe operations and full isolation of the live parts from the users. Versions available with degree of protection IP55, IP65 and NEMA4X (UL), in yellow/red and grey/black.

### Faster and Securer Connections

The cage clamp connections of the MPW12 motor protective circuit breakers provide faster installation of power cables and accessories. With a screwdriver suitable for the fitting, it is possible to make the connections in a shorter time in comparison to screw terminals. Due to special springs on the connection terminals, retightening is not necessary, because the connection system ensures constant pressure on the cables.

### Insulated Enclosures

In applications with a reduced number of starts (15 starts/hour), it is possible to use surface-mount boxes IP41/IP66 for MPW12 and MPW18, and IP55 for boxes with MPW40, with direct drive on the circuit breakers very close to the electric motor. The rotary handle of the surface-mount boxes enables the lock out with up to three padlocks. On the surface-mount boxes for models MPW12 and MPW18, versions with keyed emergency pushbuttons enable the lock out of their operation. ACBS, ACBF, URMP/SRMP are accessories that can be installed within the box.

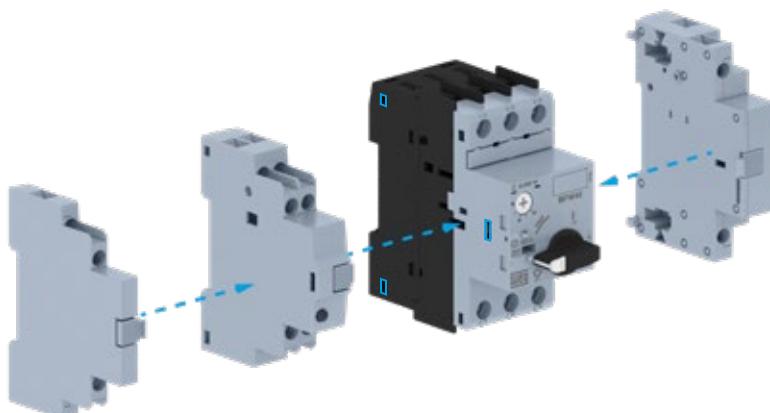

### Interchangeable Accessories

All the main accessories are interchangeable among the models MPW18...80, allowing the optimization of items and greater flexibility of their applications. Example: the front contact block can be installed on up to three different models.

### Easy Assembly

Assembly and disassembly of the side contact blocks, trip indication blocks and undervoltage coils without tools, just by means of fittings on the side of the circuit breaker.

### Safety in Installation

All the motor protective circuit breakers have degree of **protection IP20** on the front to prevent inadvertent contacts with the live parts without requiring additional accessories.

## Benefits of Using Motor Protective Circuit Breakers on Electrical Panels

### Inventory Optimization

Conventional panels that use fuses for protection against short circuit require replacement after they trip. The spare fuses for panels with such conception require physical space in the maintenance area and inventory item control. Using motor protective circuit breakers, that is not necessary, because they allow reset even after a trip by short circuit.

### Shorter Downtime

Stoppages because of an overload trip may be common in some applications with this kind of characteristic in case of some anomaly. In some operations, the downtime of machines may represent huge losses and damages to industrial processes. The use of motor-protective circuit breakers provides shorter reset time of a machine/equipment, because the circuit breaker allows its reset even after a trip by short circuit.

### Design Simplification

In order to size fuses on electrical panels for motor start, it is necessary to pay attention to the time of each start: direct on-line (5s), delta-star (10s), reduced voltage (15s). Also, in the sizing of components to protect delta-star starters using fuses, we often find applications that require six fuses and thus additional wiring. Using motor protective circuit breakers, your project is simplified down to a single component.

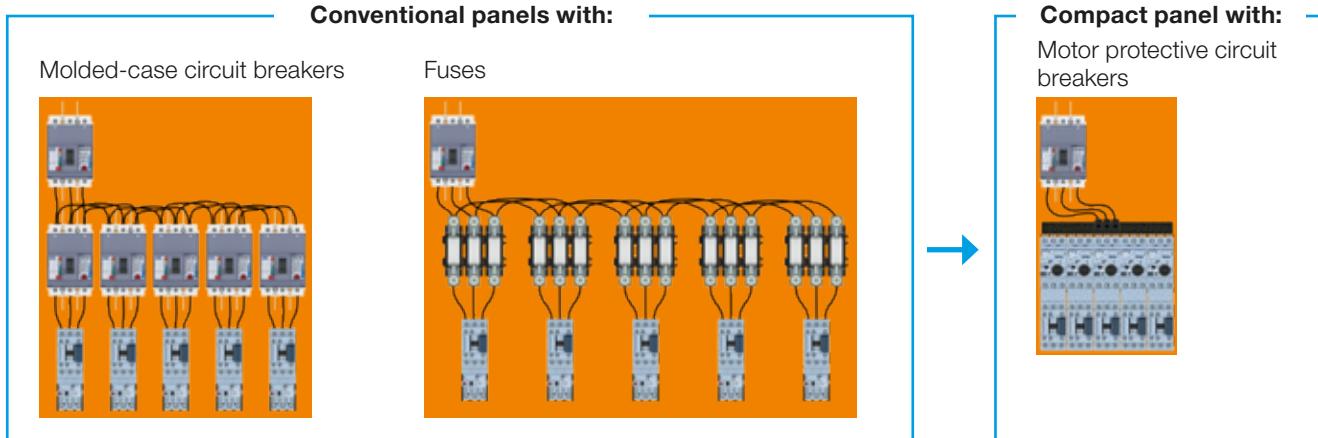

### Cable Connection

The circuit breakers allow direct connection of cables to them without the need for terminals at the end of the connection cables.

### Cost Reduction

The designs with motor protective circuit breakers are smaller than those with protection by molded-case circuit breakers or fuses. They allow the assembly on DIN rail 35 mm, avoiding unnecessary expenses with fastening by screws. Over 50% of reduction of assembly space.

# ENVIRONMENTALLY FRIENDLY

Manufactured with materials of low impact on the environment and according to the RoHs international requirements.

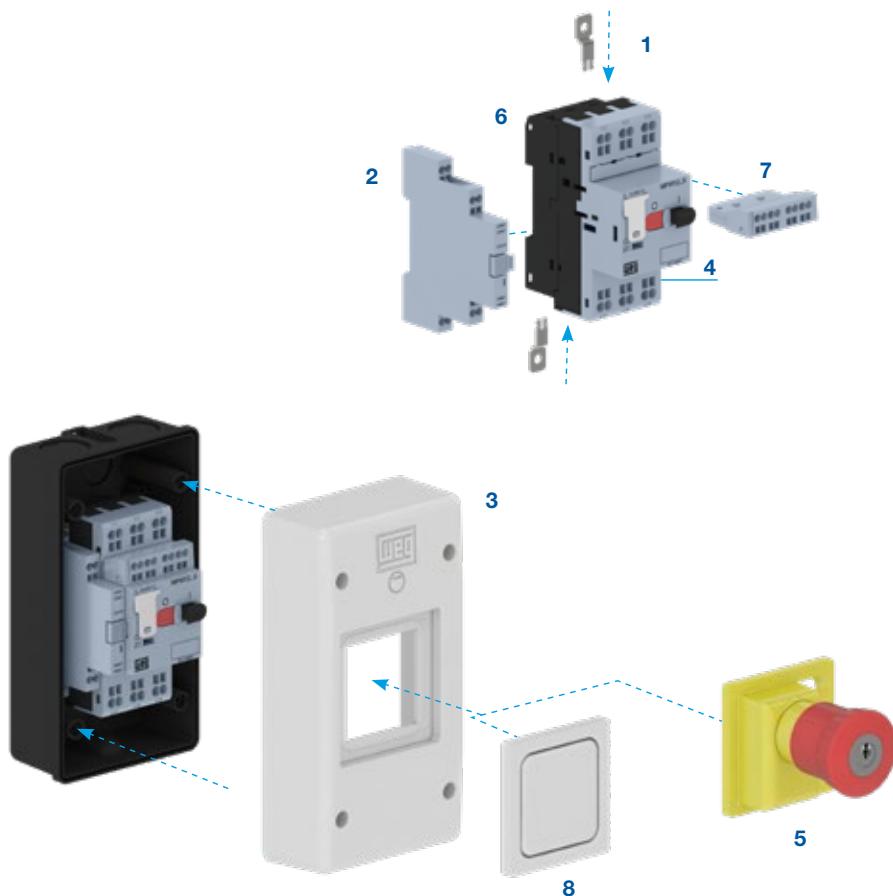

Issued by the Parliament and by the European Council, the RoHS restricts the use of hazardous substances on electronic products traded in the countries members of the EU, **prohibiting the ingress of new products on the market** in case they contain lead, cadmium, hexavalent chromium, mercury, polybrominated biphenyl (PBB) and polybrominated diphenyl ethers (PBDE).

The MPW line complies with the RoHS requirements.

# MPW12 Motor Protective Circuit Breaker

## Overview

1 - Push-in-lugs PLMP

2 - Side-mounted auxiliary contact block ACBS\_S  
(spring terminal)

3 - Insulated enclosures

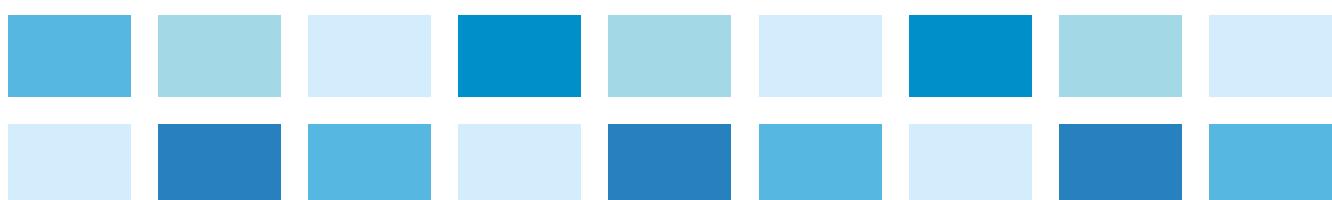

4 - Scale cover SCMP

5 - Emergency pushbutton for insulated enclosure

6 - MPW12 motor protective circuit breaker (spring terminal)

7 - Front mounted auxiliary contact block ACBF\_S (spring terminal)

8 - MPE41 cover for PE66

### Selection Table

#### MPW12 Motor Protective Circuit Breaker up to 12 A - Thermomagnetic or Magnetic Only

- Spring terminal
- With overload and short-circuit protection
- Fixed short-circuit release 13 times the maximum circuit breaker rated current
- With phase-failure sensitivity according to IEC 60947-4-1
- With temperature compensation
- For use as main switch (IEC 60947-2)
- Self-protected against short circuit up to 6.3 A at 500 V ac
- Thermomagnetic Motor Protective Circuit Breaker with overload protection (class 10)

#### MPW12 Motor Protective Circuit Breaker - Thermomagnetic - Overload and Short-Circuit Protection

Notes: 1) The values are only valid for WEG W22 motors at S1 duty and service factor equal to 1.

2) For magnetic Motor Protective Circuit Breakers (MPW12i), it is necessary to use an overload protection device class 10.

# MPW18 Motor Protective Circuit Breaker

## Overview

- 1 - MPWD18 Motor Protective Circuit Breaker (screw terminal)
- 2 - Feeder terminal FTBBS
- 3 - Three-phase busbar BBS
- 4 - Push-in-lugs PLMP
- 5 - Side-mounted auxiliary contact block ACBS (screw terminal)
- 6 - Undervoltage release URMP or shunt release SRMP (screw terminal)
- 7 - Front mounted auxiliary contact block ACBF (screw terminal)

- 8 - Trip signaling block TSB
- 9 - Link module manual motor protector + CWC miniature contactor
- 10 - Link module manual motor protector + CWB contactors
- 11 - Contactors CWB9...38
- 12 - Miniature contactors CWC07...16
- 13 - Insulated enclosure
- 14 - Cover for PE66
- 15 - Emergency pushbutton for insulated enclosure

**Selection Table****MPW18 Motor Protective Circuit Breaker up to 18 A - Thermomagnetic or Magnetic Only**

- Allows the operation and overload and short circuit protection of electric motor
- Fixed short-circuit release 13 times the maximum circuit breaker rated current

# MPW40 Motor Protective Circuit Breaker

## Overview

- 1 - MPW40 Motor Protective Circuit Breaker  
2 - Feeder terminal FTBBS  
3 - Three-phase busbar BBS  
4 - Push-in-plugs PLMP  
5 - Side-mounted auxiliary contact block ACBS  
6 - Undervoltage release URMP or shunt release SRMP  
7 - Front mounted auxiliary contact block ACBF  
8 - Door coupling rotary handle RMMP  
9 - Door coupling rotary handle MRX  
10 - Link modules motor protective circuit breaker + contactor (CW07/CWC0/CWM)  
11 - Miniature contactor CW07

- 12 - Front plate FME55  
13 - Insulated enclosure PE55  
14 - Insulated enclosure LPE55  
15 - Trip signaling block TSB  
16 - Miniature contactor CWC025  
17 - LST25 - Feeder terminal for "Type E" motor starter according to UL  
18 - Miniature contactors CWC07...16  
19 - Current limiter  
20 - Scale cover SCMP  
21 - Link module manual motor protector + CWB contactors  
22 - Contactors CWB9...38

### Selection Table

#### MPW40 Motor Protective Circuit Breaker up to 40 A - Thermomagnetic or Magnetic Only

15 / 11	25 / 18.5	25 / 18.5	40	520	MPW40i-3-U040	12382552	

Notes: 1) The values are only valid for WEG W22 motors at S1 duty and service factor equal to 1.

2) For magnetic Motor Protective Circuit Breakers (MPW40i), it is necessary to use an overload protection device class 10.

## MPW80 Motor Protective Circuit Breaker

### Overview and Selection Table

1 - MPW80 Motor Protective Circuit Breaker

2 - Push-in-lugs PLMP

3 - Side mounting auxiliary contact block ACBS

4 - Undervoltage release URMP or shunt release SRMP

5 - Front mounted auxiliary contact block ACBF

6 - Trip signaling block TSB

7 - Scale cover SCMP

8 - Door coupling rotary handle RMMP65

9 - Door coupling rotary handle MRX65

10 - LST25 - Feeder terminal for "Type E" motor starter according to UL

### MPW80 Motor Protective Circuit Breaker up to 80 A - Thermomagnetic or Magnetic Only

- Allows the operation and overload and short circuit protection of electric motor
- Fixed short-circuit release 13 times the maximum circuit breaker rated current
- With phase-failure sensitivity according to IEC 60947-4-1
- With temperature compensation
- For use as main switch (IEC 60947-2)
- Short-circuit breaking capacity from 65 kA up to 80 A at 380 V ac according to IEC 60947-2
- Thermomagnetic Motor Protective Circuit Breaker with overload protection (class 10)

### MPW80 Motor Protective Circuit Breaker - Thermomagnetic - Overload and Short-Circuit Protection

Reference values for selecting protection of three-phase electric motors 60 Hz - 4 poles <sup>1)</sup>			Rated current In (A)	Overload release setting	Instantaneous magnetic trip 13x In	"Box" terminal		Weight kg

Notes: 1) The values are only valid for WEG W22 motors at S1 duty and service factor equal to 1.

2) For magnetic Motor Protective Circuit Breakers (MPW80i), it is necessary to use an overload protection device class 10.

3) Under process.

# MPW100 Motor Protective Circuit Breaker

## Overview and Selection Table

11 - MPW100 Motor Protective Circuit Breaker

12 - IB insulators MPW100

13 - Side-mounted auxiliary contact block ACBS

14 - Undervoltage release URMP or shunt release SRMP\_ MPW100

15 - Front mounted auxiliary contact block ACBF MPW100

16 - Trip signaling block TSB\_MPW100

17 - Door coupling rotary handle MR MPW100

18 - Door coupling rotary handle MRX100

## MPW100 Motor Protective Circuit Breaker - Thermomagnetic

- Allows the operation and overload and short circuit protection of electric motor
- Fixed short-circuit release 13 times the maximum circuit breaker rated current
- With phase-failure sensitivity according to IEC 60947-4-1
- With temperature compensation
- For use as main switch (IEC 60947-2)
- Self-protected against short circuit up to 100 A at 220/240 V ac
- Short-circuit breaking capacity of 50 kA ( $I_{cu}$ ) at 440 V ac according to IEC 60947-2
- UL/CSA certifications
- Thermomagnetic Motor Protective Circuit Breaker with overload protection (class 10)

## MPW100 Motor Protective Circuit Breaker - Thermomagnetic - Overload and Short-Circuit Protection

Reference values for selecting protection of three-phase electric motors 60 Hz - 4 poles <sup>1)</sup>			Rated current In (A)	Overload release setting 	Instantaneous magnetic trip 13x In 	"Box" terminal		Weight kg
220-240 V cv / kW	380-415 V cv / kW	440-480 V cv / kW				Reference	Code	
25 / 18.5	50 / 37	60 / 45	75	55...75	975	MPW100-3-U075	10076551	2.2
30 / 22	60 / 45	75 / 55	90	70...90	1,170	MPW100-3-U090	10076552

Notes: 1) The values are only valid for WEG W22 motors at S1 duty and service factor equal to 1.

2) For overload protection, it is suggested the use of overload relays.

## MPW40t Motor Protective Circuit Breaker

### Selection Table

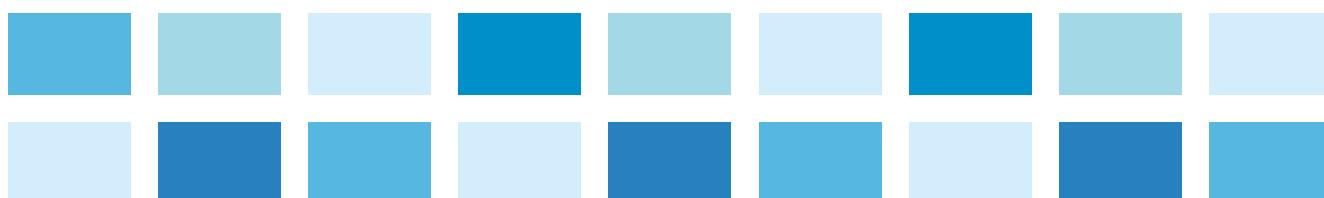

- Allows the operation and overload and short circuit protection of inductive loads
- Used in the protection of transformers and electric motors with high starting currents
- Fixed short-circuit release 19 times the maximum circuit breaker rated current
- Breaking capacity up to 100 kA at 380-415 V ac up to 10 A
- With phase-failure sensitivity according to IEC 60947-4-1
- With temperature compensation
- Thermomagnetic Motor Protective Circuit Breaker with overload protection (class 10)

## Altitudes - Correction Factors

The MPW motor protective circuit breakers do not undergo any changes to their specified performance when applied at an altitude of up to 2,000 meters above sea level. However, as the altitude increases, the atmospheric properties vary in terms of dielectric rigidness and pressure. Therefore, current and voltage correction factors must be applied according to the table on the right:

Altitude (above sea level) - h	Rated operational voltage $U_e$	Current correction factor $L_u$
$h \leq 2,000$ m	690 V	1 x ln
2,000 < h ≤ 3,000 m	550 V	0.96 x ln
3,000 < h ≤ 4,000 m	480 V	0.93 x ln
4,000 < h ≤ 5,000 m	420 V	0.90 x ln

Notes: 1) 500 V with plastic enclosures.

2) Reduce current for temperatures exceeding +60 °C (87% for 70 °C).

3) Only available with spring terminal.

4) For magnetic Motor Protective Circuit Breakers, it is necessary to use an overload protection device class 10.

## Mounting Configurations

Live or grounded parts distance to the circuit breaker				
Model	$U_e$	Minimum distance between the circuit breaker and live or grounded parts (mm)		
		B	C	A
MPW12/18	Up to 690 V	20	75	9
MPW40	Up to 500 V	30	95	9
	Up to 690 V	50	95	30
MPW80	Up to 690 V	50	150	10
MPW100	Up to 690 V	150	167	30

The motor protective circuit breaker can be mounted in any position, but according to IEC 60447 standard, the "On - I" indicator must be to the right or up.

## DC Operation

The MPW12...MPW100 can also be used for operating continuous current loads. For such operation it is necessary to connect 2 or 3 poles in series.

See recommended circuits and their voltage limits in the table on the right.

Short-circuit breaking capacity  $I_{cu} = 10$  kA for all configurations.

Circuits	Maximum direct current	Notes
	150 V dc	System not grounded; 2 poles in series.
	300 V dc	System grounded; 2 poles in series.
	450 V dc	System grounded; 3 poles in series.

## Coordination Tables

### Type 1 Coordination - 380 V ac/60 Hz - $I_q = 50 \text{ kA}^1$

Reference values 4-pole motor power		Motor current	Motor protective circuit breaker	Setting range	Contactor
0.16 cv	0.12 kW	0.51 A	MPW40	0.40...0.63 A	CWM07 / CWM9
0.25 cv	0.18 kW	0.66 A		0.63...1.0 A	
0.33 cv	0.25 kW	0.83 A		1.0...1.6 A	
0.50 cv	0.37 kW	1.20 A		1.6...2.5 A	
0.75 cv	0.55 kW	1.67 A		2.5...4.0 A	
1.0 cv	0.75 kW	1.74 A		4.0...6.3 A	
1.5 cv	1.1 kW	2.56 A		6.3...10 A	CWM9

	100	100	100	-	75	50	-	50	38	200	12	9	160	6	6	160

Self-protected against short circuit up to 100 kA.

- No backup fuses required.

1) In cases where prospective short-circuit current >  $I_{cu}$ , backup fuses are required.

2) Available with spring terminal only.

3)  $U_e \leq 380$  V.

4)  $U_e = 400/415$  V.

	65	65	65	-	25	25	-
	80	80	80	-	25	25	-

Self-protected against short circuit up to 100 kA.

- No backup fuses required.

1) In cases where prospective short-circuit current >  $I_{cu}$ , backup fuses are required.

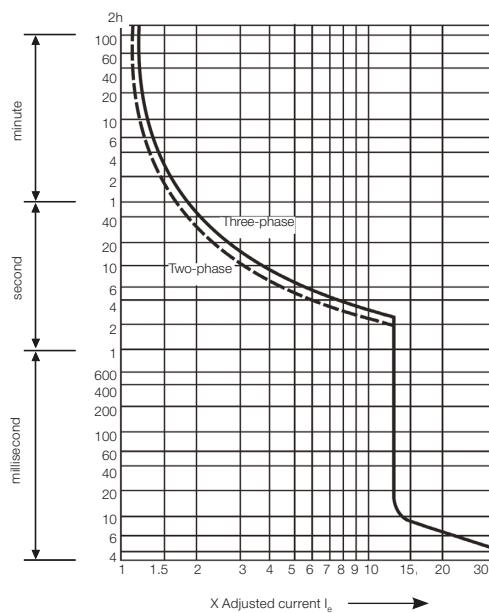

◆ Not applicable as the MPW40 and MPW80 motor protective circuit breakers already have 100 kA  $I_{cu} / I_{cs}$  in related ranges.

## Characteristic Curves

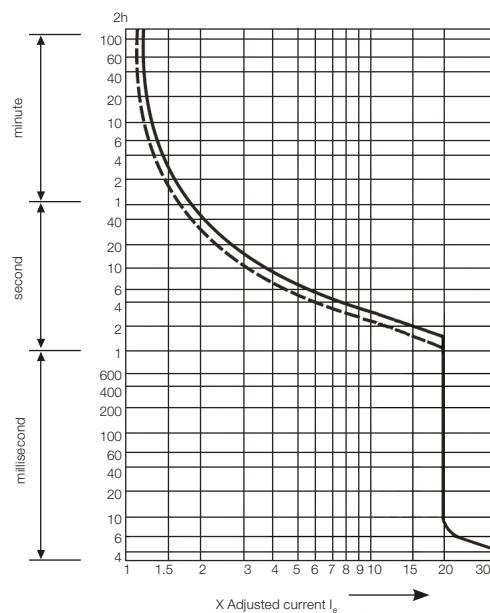

The tripping characteristic shows the motor circuit breaker trip time in relation to the rated current. The curves show average tolerance range values for an ambient temperature of 20 °C, starting in cold state.

Thermal trip time when working in operating temperature is reduced to around 25% of the presented values. Under normal operating conditions, all 3 circuit breaker phases must be conducting.

## Global presence is essential, as much as understanding your needs.

### Global Presence

With more than 30.000 employees worldwide, WEG is one of the largest electric motors, electronic equipments and systems manufacturers. We are constantly expanding our portfolio of products and services with expertise and market knowledge. We create integrated and customized solutions ranging from innovative products to complete after-sales service.

WEG's know-how guarantees the **MPW motor protective circuit breakers** are the right choice for your application and business, assuring safety, efficiency and reliability.

**Availability** is to have a global support network

**Partnership** is to create solutions that suit your needs

**Competitive edge** is to unite technology and innovation

# Know More

High performance and reliable products to improve your production process.

Excelence is to provide a whole solution in industrial automation that improves our customers productivity.

Visit:

[www.weg.net](http://www.weg.net)

[youtube.com/wegvideos](https://youtube.com/wegvideos)
