Signaling Units
Modular tower lights
Harmony ${ }^{\text {® }}$ type XVB $\varnothing 70$
Illuminated beacons, tower lights for customer assembly
(up to 5 units)

## Presentation

The beacons and tower lights of the Harmony XVB range are visual or audible signaling units used for indicating, throughout $360^{\circ}$ and at a distance, the various states or operation sequences of a machine or installation. Examples: start, stop machine, no material, call technical staff, fault signaling, etc.

## Complete illuminated beacon XVBL

Readily assembled 1 with a single illuminated signaling unit:
$\square$ steady light (with incandescent bulb or LED),
$\square$ flashing light (with incandescent bulb or LED),
ㅁ or "flash" (with discharge tube).

The XVBL beacons comprise:

- A base unit with a removable terminal block and a bottom or side cable entry.
- One colored illuminated unit (green, red, orange, blue, clear or yellow).

## Customer assembled tower light XVBC

Variable composition of 1 to 5 illuminated or audible units that are supplied as separate items for customer assembly. Maximum configuration: 5 units or 4 units + 1 "flash" unit.
The XVBC tower lights comprise:

- A base unit with a removable terminal block and bottom or side cable entry 2.
- 1 to 5 colored illuminated units (green, red, orange, blue, clear or yellow):
$\square$ with integral LED 3,
$\square$ with integral LED and diffuser 4 (1),
$\square$ for incandescent bulbs or base mounted LEDs 5 .
- 1 or 2 audible units 6 .
- A maximum of 1 "flash" discharge unit (5 Joule or 10 Joule) 7, for mounting on top of the bank.
■ A top cover 8 (except when using a "flash" discharge tube).
■ The illuminated or audible units stack vertically and are easily locked and unlocked using an integral clamping ring. Electrical connections between each unit are made automatically.
- A light diffuser, pre-fitted in illuminated units $X V B C 2 B \bullet D$ with a base mounted LED, distributes the light evenly over the lens surface. When using the modular tower lights in bright ambient light conditions, remove the diffuser to improve contrast. - Connection on the AS-Interface cabling system is possible by ordering a dedicated base unit. For more information on AS-Interface, please see our website www.schneider-electric.om.

## Accessories for beacons XVBL and tower lights XVBC

■ Fixing base comprising a support tube glued into a plastic fixing plate, for a height beneath the base unit of 80,380 or 780 mm 9 .
■ Fixing plate for mounting on vertical support 10.

- Support tube concealment cover, height 100, 400 or 800 mm 11.

■ Adaptor and 13P cable gland 15.

- Base mounted LED 16 or incandescent bulb 17 (2).

## Mounting, protection and conformity to standards

■ Base unit fixed directly onto a panel using 2 screws (IP 66 protection).
■ Fixed using a fixing base comprising of an aluminium support tube glued into a
plastic fixing plate (IP 65 protection).
■ Conformity to EN/IEC 60947-5-1 standard.

- Product certified UL, CSA, CCC, CE, UKCA and EAC.

## Cabling

By means of removable terminal block incorporated in base unit (simplified wiring). The screw and captive cable clamp terminals are protected to prevent any accidental contact with live parts.
